- Barren Ground
- Quebec-Labrador
- Central Canada
- Woodland
- Mountain
- In Velvet

Point Measurement

|   | Right | Left |
|---|-------|------|
| I. Number of Points on Each Antler Excluding Brows                          |       |      |
| II. Number of Points on Each Brow   |       |      |
| III. Length of Main Beam  |       |      |
| P-1. Length of Brow Palm or First Point                                     |       |      |
| P-2. Length of Bez Tine or Second Point                                     |       |      |
| P-3. Length of Rear Point (If Present)                                      |       |      |
| P-4. Length of Second Longest Top Point                                     |       |      |
| P-5. Length of Longest Top Point  |       |      |
| IV. Width of Brow Palm  |       |      |
| V. Width of Top Palm  |       |      |
| C-1. Circumference at Smallest Place Between Brow and Bez Point             |       |      |
| C-2. Circumference at Smallest point Between Bez and Rear Point             |       |      |
| C-3. Circumference at Smallest Place Between Rear point and First Top Point |       |      |
| C-4. Circumference at Smallest Place Between Two Longest Top Points         |       |      |
| VI. Sub Total   |       |      |
| VII. Inside Spread of Main Beams  |       |      |
| VIII. Total Animal Score  |       |      |
| IX. Bow Used (Recurve +0 Points, Longbow +1 Point; Selfbow +2 Points)       |       |      |
| X. Arrow Used (Self-made Wood +1 Point)                                     |       |      |
| XI. Stalking/Ground Blind +1 Point  |       |      |
| XII. Unguided +1 Point  |       |      |
| XIII. Point Sub Total (Add Lines VIII Through XII)                          |       |      |
| <b>COMPTON POINT TOTAL (Add Lines VIII and XIII)</b>                        |       |      |

I certify that the above animal was measured in accordance with the Compton Traditional method and that the data are correct to the
